CLEANING AND MAINTENANCE OF YOUR CLEAR VISION COOLING PRODUCT

WITH A LITTLE CARE YOUR PRODUCTS WILL REMAIN CLEAR AND SCRATCH-FREE

- To clean the surface of your product, use the Clear Vision Cooling Glass & Interior Cleaner spray together with a microfiber cloth.
- If the cleaner spray is not available, use a microfiber cloth and warm, soapy water (laundry detergent) to gently clean the entire surface area. Use a dry cloth to dry the surface area.
- If the surface is static, use an anti-static cleaner, such as Burnus.

- Do not use a sponge or dry cloth until the surface has been rinsed with water.
- Do not use window cleaner or any other harsh solvents and cleaners like ammonia, acetone, carbon tetrachloride, or gasoline as a cleaning solution.
- Do not use a high-pressure washer to clean the product.
