Gert Bouwman

Founder and owner of the Bouwman Group in the Netherlands, with many subsidiary companies, known as a leading provider of components for the refrigerated trade for the past 40 years. With several worldwide patents he is proving his innovativity and creativity in the field of technical components. Seven years ago, he started with the idea of a recyclable plastic doors for refrigerated cabinets, made of PET.

Wolfgang Klingenberg

Founder and Owner of the company Door Tech GmbH Germany, boasts more than 20 years' worth of experience in the international business of equipment for cooling furniture of glass lids and doors.

Michael Gregorcic

The owner and president of DTG is a member of the Gregorcic family, renowned as one of the largest suppliers of plastic parts for vehicles and recreational vehicles. Michael managed his family business for 16 years. The company operates a state-of-the-art production plant in Slovenia, where it also produces acrylic windows. Based on his experience in this area, he made the transition to refrigerated doors wherein it teamed up with renowned expert in this field.

All three share the belief that lightweight doors represent an important future step in the development of industry. By joining forces of this forward-thinking individuals, the state-of-the-art production and highest level of quality PET doors were born. New doors for refrigerated cabinets are retrofittable, OEM applicable and most importantly 100% recyclable.

All doors produced by the DTG are safe, fully transparent, lightweight and easy to handle, while requiring virtually no maintenance over long life. For retailers looking for a way to achieve high savings at a low cost, the company has a range of options tailored to different stores' needs.

The Full Vision doors consist of a thermoformed interior sheet combined with a flat exterior sheet, ensuring long term durability. In addition, glass silicate layers are applied to the plastic sheet for scratch resistance. Our company offers a range of flexible doors for milk trolley cabinets, lightweight sliding doors and innovative lightning system, E-Flex LED, which ensures that products are displayed in the right light, maximising visibility and sales.

We hereby extract the most important advantages for retail markets
